

Module 57, SEVESO / COMAH Regulations

Determine whether your site is in scope of the Directive, understand compliance duties for lower tier sites, and get an outline of upper tier duties

For dates and venues, please visit: [CHCS Training](#)

This module will help you determine if you are in scope of Directive 2012/18/EU on the Control of major-accident hazards involving dangerous substances, otherwise known as the SEVESO III Directive and the UK COMAH 2015 Regulations transposing the Directive. It will also cover the main duties for lower tier establishments and outline the main duties for upper tier sites.

The SEVESO I Directive arose from a major accident in Seveso, Italy in 1976 and was implemented across the EU as a Directive ([Directive 82/501/EEC](#)) to prevent major-accident hazards. Each EU Member State is required to transpose the Directive into national legislation. The UK introduced the Directive as the "Control of Major Accident Hazards (COMAH) Regulations" in 1999. The SEVESO Directive has been revised twice, with the latest SEVESO III Directive implemented in the UK as the COMAH 2015 Regulations with effect from 1 June 2015.

Who Should Attend?

This module is aimed at those with responsibility for SEVESO/UK COMAH-related activities, pre-COMAH sites and those organisations coming into scope. It will also appeal to organisations already in scope, providing detailed information on lower tier duties, serving as a refresher course. The Module will explain how to apply the classification rules to dangerous substance inventories to determine whether in scope. It will also cover the main duties for lower tier sites in detail, outline upper tier duties and the responsibilities of competent authorities.

Benefits Of Attending

Attending this Module will ensure that you understand the legal duties that apply to your establishment and how to comply with these. **The most important aspect of this training is that it will help you to identify and manage the major accident hazard risks within the establishment.** It will help you to take preventive as well as mitigative measures to minimise the risk of catastrophic failure resulting in fatalities and/or severe pollution to the environment. To ensure the most effective training with optimum involvement in participative exercises, there will be a limit of 14 on the number of students.

IOSH members are entitled to include this module in their continuing professional development (CPD) records.

SAMPLE PROGRAMME

- Session 1
Legislation: background and a review of historical Major Accidents.
Refresher: where to find SEVESO / COMAH Relevant information within SDS.
Interactive discussions.
- Session 2
Definition of the Inventory Calculating Rules.
Exercise:
Calculating SEVESO / COMAH thresholds via 2% Rule and Aggregation Rules as group exercise using attendee's own examples.
- Session 3
SEVESO / COMAH Regulations for Lower Tier Duty Holders with practical advice on how to comply – what the Competent Authority expects and relevant guidance.
- Session 4
Outline of SEVESO / COMAH Regulations for Upper Tier Duty Holders
Final Q & A Session

What You Will Learn

The presentation is interspersed with exercises using a variety of resources to enable participants to gain confidence and ensure a good understanding of how to determine if your establishment is in scope of the legislation, and at what level.

It then moves on to provide the knowledge necessary to comply with various duties that apply to lower tier establishments.

The focus of this Module is on providing:

- information on where to find relevant information in safety data sheets and how to use it
- practical, proprietary Excel Templates to work out if in scope using your site inventory of dangerous substances
- how to notify the Competent Authority if in scope
- major accident scenarios and lessons to be learnt
- practical advice on what to expect once your establishment has notified the Competent Authority
- how to prepare for any follow up visits from regulators
- template for developing your individual Major Accident Prevention Policy.

The Module Includes The Following:

An overview of the SEVESO Directive and UK COMAH Regulations concerning the Control of Major Accident Hazards

- In-depth review of the SEVESO Directive and UK COMAH Regulations:
 - Step by step guidance on how to work out if your establishment is in scope and at what tier.
 - Variations in duties for lower and upper tier Establishments.
- Process of notifying Regulators if you come into scope with a practical session for a fictional Establishment
- Detailed explanation on how to comply with lower tier establishment duties, including preparing a Major Accident Prevention Policy
- Overview of upper tier duties
- Inspection regimes and fees

Module Tutor

This module will be presented by Shailesh Purohit. Shailesh is a Chartered Fellow of the Institution of Safety and Health (CFIOSH) and an experienced Chemical Technologist with degrees in Science, Chemical Engineering and an Environmental Diploma, with experience of interpreting and implementing SEVESO / COMAH legislation relating to dangerous substances. He has been responsible for compliance with SEVESO / COMAH of an International European Coatings Company and more recently for a major International Fuel Storage and Distribution Company as a Process Safety Engineer. He has been a DGSA for fifteen years in the transport of hazardous goods by road. He has been an active member of IOSH Hazardous Industry Group for several years and has representation on the UK National Process Safety Forum.

Reserving A Place

You can reserve a place at this course, online by visiting [Chemical Hazards Training](#), finding the next occurrence of the course and completing the on-line booking form. Courses are only available to CHCS Members. If you are not an existing member and would like to join, again, the process is simple and you can complete our online Membership Registration form at: [Join Us](#).

Our training online courses are £285 (+VAT).

Your Attention Is Drawn to These Conditions

Delegates can be substituted at any time, subject to payment of membership fee if applicable. However, once booked, the full fee is payable. As this is a limited space training event refunds can only be made if CHCS is notified in advance and is able to successfully re-offer the place to another delegate.

CHCS reserves the right to alter or cancel the programme due to circumstances beyond our control. If CHCS cancels, then refunds will be made.

Participants will need to bring copies of their dangerous substance Safety Data Sheets. Experience has shown that delegates may find hard copy easier to use for the exercises than pdfs. They will need to bring along calculators and / or Laptops (Excel Spreadsheet) to apply the various COMAH Aggregation Rules to determine if they are in scope.
